EAWS® – Ergonomic Assessment Worksheet ISO/TR 23076:2021

EAWS® is the internationally recognized standard for assessing the ergonomic risk of workplace activities. The procedure evaluates clocked and unclocked workplaces and is widely used as a standard ergonomic tool in various industries.

EAWS® overview:

- Evaluation of physical loads
 - static postures
 - action forces
 - manual load handling
 - repetitive loads of the upper extremities
 - extra points
- Determination of a risk point value
- Risk visualization by traffic light display (green/yellow/red)
- In focus: Evaluation of manual activities in the field of quantity and series production
- High transparency thanks to process description on Basis of an MTM process building block system
